Synopsis	The Inductive Bible Study method is a time-tested way to approach studying Scripture. This method makes observations on a passage of Scripture and then draws conclusions based on those observations. We will be led and guided into the bible study skills of asking crucial questions, studying key words and themes, drawing out clues from the passages, and making cross-references to related passages. Finally, as our goal is not simply to learn new information but to be transformed by the Word of God, we will respond to and apply what we have observed from the Bible passage.
